

The Trade and Animal Welfare Coalition (TAWC) represents over 15 UK-based NGOs who share a vision for an emergent British trade policy that cares for animals. TAWC's members have global reach - enabling us to gather information from offices covering six continents and 40 countries with whom the UK is likely to have a trade relationship. Our objective is to provide robust evidence and insight into the movement of animals and animal products to safeguard, improve and promote animal welfare standards in the UK.
